EDUCATION

IIT JODHPUR

B.TECH IN COMPUTER SCIENCE

Dec 2021 - May 2025 | Jodhpur, RJ

TIRUMULA JUNIOR COLLEGE

INTERMEDIATE

Visakhapatnam

COURSEWORK

Data Structures and Algorithms

Software Engineering

Operating Systems

Computer Networks

Database Management Systems

Deep Learning

SKILLS

LANGUAGES

Proficient: C • C++ • JavaScript

Familiar: Python • Java • TypeScript

DEVELOPMENT

React • Next.js • Node.js • Express •

Spring Boot • Django • FastAPI • REST

APIs • MongoDB • PostgreSQL • MySQL

• Firebase

CLOUD & DEVOPS

AWS • Azure • Docker • GitHub Actions

• Terraform • CI/CD • System Design

AI & AGENTS

Agentic orchestration • LLM tool/function

calling • RAG (pgvector) •

OpenTelemetry-traced LLM pipelines

SECURITY

Threat modeling • OWASP •

Nmap/Nuclei/SQLMap/ZAP/Burp •

MITRE ATT&CK

POR

• WebD Head, Ignus 2024 (IITJ Cultural Fest)

• People Leader, Don Bosco's High School

EXPERIENCE

ICICI BANK | SECURITY ENGINEER – INTERNAL AUDIT (RED TEAM)

Mar 2026 - Ongoing

- Architecting, an AI-driven multi-agent autonomous penetration-testing and attack-surface-management platform in Python (414 modules): an LLM-driven orchestration loop (Claude agentic loop; CentralBrain/MetaBrain state machines with circuit breakers and fallback trees) executing an 8-phase assessment — recon/OSINT, vuln analysis, attack-graph chaining, tiered exploitation, and compliance reporting.
- Integrated 15+ security tools (Nmap, Nuclei, SQLMap, OWASP ZAP, Katana, HTTPx, Sublist3r) run in isolated Docker/Kali containers via a custom executor with a 10-layer BuildKit cache for fast, reproducible runs.
- Built security-as-code guardrails — scope-authorization gate, httpx egress firewall, non-destructive exploitation tiers, JSON audit logging with PII redaction — and instrumented the platform with OpenTelemetry tracing and Prometheus metrics for live-site debugging.

ICICI BANK | CLOUD SECURITY – INTERNAL AUDIT

Aug 2025 - Feb 2026

- Built a cloud security-assessment platform (Python/boto3 backend, Next.js UI) across 29 ICICI AWS accounts: graph-based blast-radius analysis mapping identity-and-resource relationships to trace privilege-escalation and lateral-movement paths, plus an IAM analyzer for over-privileged roles and policies.
- Automated misconfiguration detection to scan 100% of resources per account — replacing a manual 10% sampling process — cutting audit time while widening coverage; audited AWS and Azure against CIS Benchmarks and internal SCD standards (IAM, encryption, logging, VPC/network, CI/CD) with remediation reports to leadership.

EASERENT (US STARTUP) | BACKEND DEVELOPER INTERN – JAVA

SPRING BOOT

May 2025 - Jul 2025

- Built and shipped RESTful APIs for a multi-tenant SaaS property-management platform using Java Spring Boot, Hibernate/JPA, and MySQL, delivering the Property, Inspection (4-stage approval workflow), and Reports (dynamic filtering + PDF export) modules.

PROJECTS

IGNUS - IIT JODHPUR | REACT | DJANGO | WEBSITE

- Led a team of 8 to design and ship the official fest website, increasing registrations by 30% and supporting 2,000+ attendees.
- Built a personalized event recommendation system from users' pass purchases, improving engagement and session discovery.

ACHIEVEMENTS

- Awarded the Panasonic Rathichhatr Scholarship (2021) — 1 of 30 students selected across all IITs.
- **All India Rank 6209** of 150,000+ in IIT JEE (top 4.2%).
